

AS Business 9609 - One-Page Cheat Sheet

Everything you need in the exam: how to score K / App / An / Ev on 2-12 mark questions.

Marks -> what to write

- 2 = Define/State: a precise definition (2 elements). Knowledge only.
- 3 = Define + one developed sentence. K (with a little Analysis).
- 5 = Explain: ONE point - define [K] -> apply [App] -> develop [An].
- 8 = Analyse: TWO points, each K -> App -> An chain. No judgement.
- 12 = Evaluate: intro [K], FOR + AGAINST (K/App/An), then a judgement [Ev].

The 4 skills

- [K] Knowledge: define/state the correct term or theory.
- [App] Application: use the actual business, product, people or data given.
- [An] Analysis: a "so... / which means..." chain ending in a business effect.
- [Ev] Evaluation: a justified judgement - 12-mark questions only.

The chain formula (use it every time)

Point + define [K] -> link to the business [App] -> which means... -> so... -> as a result... [An] -> (on balance / it depends... [Ev], 12 marks only).

Where each goes: K first, App second, every link after that = An, and Ev in a final paragraph.

Connectives -> destinations

- Links: which means, so, therefore, as a result, this leads to, ultimately.
- End on: revenue, costs, profit, cash flow, market share, productivity or survival.

Judgement - the Ev marks on 12-markers

- Give a clear decision AND say WHY one side outweighs the other.
- Add "it depends on...", short vs long term, and link to THIS business. Spend about a third here.

Ask yourself before moving on

- Defined it? (K) Named the business? (App) Reached an effect? (An) Judged it, if 12 marks? (Ev)

Avoid

- Stopping the chain early; listing instead of linking; no application; no judgement on a 12-marker.
